(d) whether Kendriya Vidyalaya, INA Colony has taken up any such quality assessment of its students for class VIII;

(e) if so, the results thereof; and

(f) if not, by when the Kendriya Vidyalaya Sangathan intends to initiate it?

THE MINISTER OF HUMAN RESOURCE DEVELOPMENT (SHRI ARJUN SINGH): (a) No, Sir. However, Kendriya Vidyalaya Sangathan (KVS) had conducted a sample survey of learners achievement for pass out students of Class-V of Kendriya Vidyalayas (KVs) in April 2006 with standardized question papers in Mathematics, English and Environmental Studies.

(b) Does not arise.

(c) The assessment of students in all classes including VII and VIII of KVs is done regularly through unit tests, half-yearly and end of session examinations.

(d) No, Sir.

(e) Does not arise.

(f) The assessment of students for all classes including class VIII is done in KV, INA Colony regularly through unit tests, half-yearly and end of session examinations.

Power to all by 2012

*202. SHRI RAJKUMAR DHOOT: Will the Minister of POWER be pleased to state:

(a) whether it is a fact that Government are planning to provide power to all by 2012;

(b) if so, what is the estimate of total power requirement of each State and UT in 2012, the sources of supply and their capacities to provide power;

(c) what directions have been given to State Electricity Boards and power distributing agencies to ensure that transmission lines are ready in time to supply power available for consumers; and

(d) the authority designated to co-ordinate for ensuring planned construction and commencement of productions, distribution of power to distributing agencies and transmission to consumers?

THE MINISTER OF POWER (SHRI SUSHILKUMAR SHINDE): (a) and (b) Yes, Sir. The National Electricity Policy notified on 12th Feb. 2005 envisages that demand for power is to be fully met by 2012.

As per the 17th Electric Power Survey of India, the forecast of electricity demand in terms of electrical energy requirement and peak electric load for the year 2011-12 has been assessed as 968 Billion Units and 1,52,746 MW respectively. The State wise details are given at Statement-I (*See* below).

To meet the demand, a capacity addition of 78,577 MW (as per State-wise details given in Statement-II (*See* below), has been proposed for the Eleventh Plan.

Out of this, a capacity of 1,935 MW has already been commissioned till 15.8.2007. Taking into account the proposed addition during the Eleventh Plan, the fuel mix of the likely installed capacity at the end of the Eleventh Plan would be about 1,44,600 MW in the thermal segment, about 51,200 MW in the hydro segment, and about 7,300 MW in the nuclear segment. In addition, approximately 21,760 MW is likely to be available from the renewable energy sources (including from small hydro, wind etc.).

(c) and (d) Electricity is a concurrent subject. In terms of the provisions of the Electricity Act, 2003, all functions of planning and coordination relating to intra-State transmission system are the responsibility of the State Transmission Utility (STU), while that of developing and maintaining an efficient, coordinated and economical distribution system is the responsibility of distribution licencees. Furthermore, the National Electricity Policy (notified in February 2005) states that the Central Transmission Utility (CTU) and STUs have the key responsibility of network planning and development based on the National Electricity Plan (as notified by the Central Electricity Authority) in coordination with all concerned organizations as provided in the Act.

The National Electricity Policy also provides that structured information dissemination and disclosure procedures should be developed by the CTU and STUs to ensure that all stakeholders are aware of the status of generation and transmission projects and plans. These should form a part of overall planning procedures.

The National Electricity Plan also gives the short term and long term perspective on generation planning. To avoid possible mismatch between generation and transmission projects, regular monitoring of power generation and transmission projects is being done by Central Electricity Authority.

Statement-I

State/UT-wise details of total power requirement in 2012

Power requirement of States and UT's during 2011-12

State/UT	Electrical Energy Requirement in Billion Units	Peak Load in MW
1	2	3
Delhi	36.293	6092
Haryana	38.417	6839
Himachal Pradesh	9.504	1611
Jammu and Kashmir	11.202	2063
Punjab	60.489	11000
Rajasthan	48.916	8482

Gas required by the power sector

*203. SHRI AMAR SINGH:
SHRI VIRENDRA BHATIA:

Will the Minister of POWER be pleased to state:

(a) the quantum of gas being made available to the power sector from the exploration of D6 block of KG basin;

(b) the approximate requirement of gas for the power sector; and
